SUMMARY

Detail-oriented marketing and administrative professional now learning front-end web development. Building a genuine foundation in HTML, CSS, responsive layouts, JavaScript, and React by hand-coding practice pages and customizing real projects, including my own portfolio sites, with Git and GitHub. Around three years of experience across social media management and marketing coordination, backed by a BS in Information System. I bring a strong eye for layout and visual design, clear communication, and a habit of working carefully and meeting deadlines. Honest about being early in my coding journey, but committed, fast-learning, and eager to grow into a junior front-end role.

WORK EXPERIENCE

Assistant Marketing Coordinator / Administrative Staff — LetzMarket **2025**
Digital Marketing — Canada (Remote)

- Supported marketing campaigns and content creation across social media, web, and print
- Collaborated with the creative team to maintain consistent branding
- Managed administrative tasks to support operations and team efficiency

Social Media Manager — No Boundaries Marketing Group **2024–2025**
Digital Marketing — USA (Remote)

- Designed and published content (reels, graphics, stories) using scheduling tools
- Monitored engagement and responded to online conversations
- Stayed updated with social trends and platform updates

EDUCATION

Bachelor of Science in Information System **2026**
Caraga State University
